## Cup with Straw by Baby Solutions Italy

The round shapes have been specially designed to make the grip easier for your baby's tiny hands. Safe and hygienic. The bottle rocks tippily but it always remains upright. The point of suction never comes into contact with the surface of tables or highchairs, thus ensuring maximum hygiene. In & out straw system. The straw goes into and out of the cup by simply turning the cover. The modern closing system ensures maximum hygiene even when you carry the cup around. The rocking movement is one of babies' favourite games. It entertains them during mealtime and stimulates their reactivity and concentration. The straw only delivers the liquid when the baby sucks. And when baby grows... mOmma grows with him thanks to Cup With Straw & Dual Handle and Cup With Straw & Single Handle. The dual grip strengthens baby's grip and helps him to move on to a single handle. The single grip helps the baby to naturally move on to normal cups and glasses.

## Feeding Bottle by Baby Solutions Italy

The round shapes have been specially designed to make the grip easier for your baby's tiny hands. The bottle rocks happily but it always remains upright. The point of suction never comes into contact with the surface of tables or highchairs, thus ensuring maximum hygiene. The rocking movement is one of babies' favourite games. It entertains them during mealtime and stimulates their reactivity and concentration. Latest technology silicon seal. The silicon seal is based on leading-edge technology. The cover seals the teat thoroughly, preventing the liquid from spilling when you carry around the Feeding Bottle. And when baby grows... mOmma grows with him, thanks to Feeding Bottle & Dual Handles and Feeding Bottle & Single Handles. The dual grip facilitates baby's grip and helps him to move on to a single handle. The single grip helps baby to naturally move on to normal cups and glasses.
